कौशल भारत-कुशल भारत

Media & Entertainment
Skills Council

ABOUT MESC

Founded in 2012, Media & Entertainment Skills Council is a Not-for-Profit Organization, registered under the Societies Registration Act, 1860. The Council has been promoted by Federation of Indian Chambers of Commerce & Industry (FICCI) with financial support by National Skill Development Corporation (NSDC).

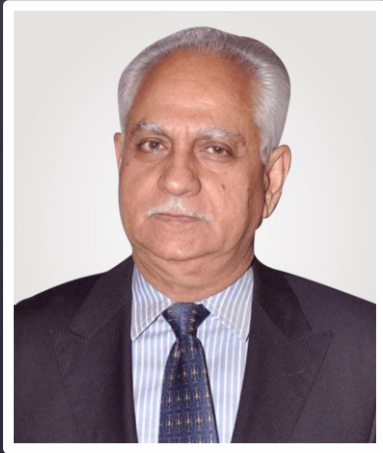

The key objective of MESC is to create a robust and vibrant eco-system for quality vocational education and skill development in Media & Entertainment Space in the country.

In addition, the Media & Entertainment Sector Skill Council aims to serve as a single source of information on M & E sector with specific reference to Skill and Human Resource Development in India. The Council is also implementing Standards, Training, and Accreditation & Reward (PMKVY) scheme of Government of India. Under the PMKVY Scheme, MESC has introduced the training programme in affiliated institutes as well.

OUR VISION

We envision to work as a bridge between Industry-Academia and create a sustainable ecosystem leading to robust skill & entrepreneurship development in Media & Entertainment Sector. We foster to develop and nurture skilling ecosystem on a large scale with benchmarks and standards as expected by Industry. Thus, promoting a culture of innovative entrepreneurship and high wage-based employment for aspirants, professionals and start-ups.

OUR GUIDING FORCE

PADMA SHRI MR. RAMESH SIPPY

Chairman, MESC, Renowned Indian Filmmaker, Director, Producer & Educationist

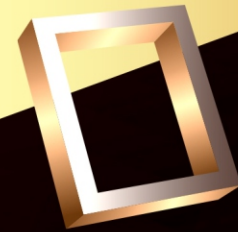

MESC is a new era of progression to the whole education system of India with full emphasis on skill-based education rather than just theory. It is one of the finest initiatives by Govt. of India. I am proud to be associated with MESC with a serious responsibility to develop a new skilled man/woman in every field. Specially in our sector of Media & Entertainment to explore & think beyond the obvious in every art & craft we are in". I am humbled & thankful to everyone who entrusted me with this great responsibility of taking it in the right direction for the next generation of youth and we have a good team to achieve success in skilling India for a better tomorrow.

SHRI. MOHIT SONI

Chief Executive Officer, MESC

With skilling comes great power and the ability to be economically independent. We take great pride in taking forward the Government's initiative towards skilling the country and in the fact that we help train the aspirants in the field they desire thus leading them to a secure future being fully economically dependent on themselves. Media and Entertainment Skills Council helps in creating a robust and vibrant eco-system for quality vocational education and skill development in Media & Entertainment Space in the country. It aims to serve as a single source of information on M & E sector with specific reference to Skill and Human Resource Development in India.

STUDENTS SPEAK

Puneet Sharma

I am proud to be a part of Brilliko Institute. This is the best place for a fresher who wants to learn multimedia courses .

Kanchan

Teachers are very cooperative and supportive. Institute's environment is very good and teachers are highly experienced.

Rakhi

Brilliko Institute of Multimedia is the best Institute in the Punjab. I recommended this institute who were searching for best placement in Punjab.

Mohammad Shezada

The best Institute for freshers who are finding quality practical education in the field of media & entertainment industry.

Harleen Kaur

Brilliko provides an excellent environment for creative thinking. I enjoy coming to the class everyday and having a really good learning experience

Pooja

Brilliko is the best institute to learn Graphic and Web Designing and other courses. The staff of the institute is very cooperative.

Hafsat

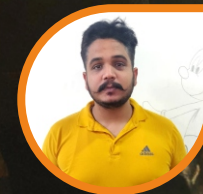

Best institute to learn Web and Graphic Designing in Ludhiana. They have professional instructors with great knowledge & experience .

Anchal

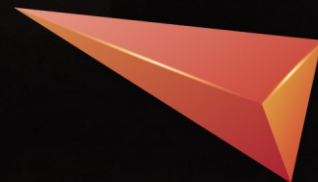

The course is quite challenging but it will be easier to succeed if you attend each class and workshop by getting involved

Lakhwinder

Highly recommended institute which provides the best education system with cooperative staff... Go for it!!

CAREER OPTIONS

A career in multimedia opens up a world of exciting possibilities. With the rapid advancement of technology and the increasing demand for digital content, multimedia professionals are in high demand across various industries. Whether you have a passion for animation, graphic design, video production, or web development, pursuing a career in multimedia can open doors to a diverse range of opportunities.

A career in multimedia offers a plethora of exciting options for creative individuals. The multimedia industry is constantly evolving, offering new opportunities for professionals to showcase their skills and make a meaningful impact. Combining technical expertise, creative vision, and a passion for storytelling, a career in multimedia can be fulfilling and rewarding in today's digital age.

EVENTS & ACTIVITY

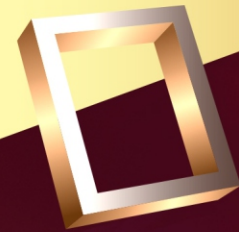

STUDENTS WORK

THE _____
MAGIC OF
ANIMATION

ANIMATION

PRE-PRODUCTION

The first stage comprises creating a visual form and defining the character design for the story. It's followed by storyboarding, where the story is detailed out frame by frame. Post storyboarding, the individual panels are edited together along with dialogue, music and sound effects to see the entire flow of a movie in a process known as animatics. It is the most important stage of the entire 3-stage process, which helps to conceive and design the film.

PRODUCTION

Production begins with modelling or creating Computer Generated (CG) backgrounds, characters and props for the characters designed in pre-production. These 3D models are then sent for texturing, where they're given another layer of authenticity by adding age-specific elements, accessories and background. The next step involves rigging, where bone structures are added, connected to customised controls. These pieces are then given lighting for that authentic look and feel. Finally, each shot is rendered to create the final output.

POST-PRODUCTION

The final stage involves compositing. This brings together all the rendered elements from the previous stage and compiles them together to form a single image sequence. It also adds post-processing effects to it that finally enhances the look and feel. Post this process, sound effects are added to give the film another layer and more depth. The background music, soundtracks and voice-overs bring the film alive. Finally, the shots are compiled and edited in seamless sync.

BAPA

BRILLIKO ADVANCE PROGRAM IN 3D ANIMATION - 30 MONTHS

The Advanced Program in 3D Animation is an immersive and comprehensive training course designed to equip participants with advanced skills in the dynamic field of computer-generated imagery. This program goes beyond the fundamentals, delving into intricate techniques and industry-standard tools to foster a deep understanding of 3D animation production. Participants will engage in hands-on projects, honing their expertise in areas such as character animation, visual effects, and motion graphics.

CAREER OPTIONS

- ★ Modelling Artist

**THE POWER
TO CREATE
NEW WORLD
IS YOURS**

VISUAL EFFECTS

The Media and Entertainment industry has enabled the VFX sector to achieve great heights. Brilliko Institute designs all its courses considering the newest trends in this field. The BAPVFX - Advanced Program in VFX gives you an in-depth understanding of the basic and advanced levels of VFX; courses like the VFX Plus - Professional Program in VFX allow you to be aesthetically and technically skilled to take on bigger challenges in the VFX industry. Like Animation, VFX too is divided into 3 stages:

PRE-PRODUCTION

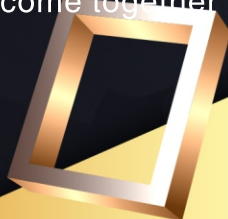

Pre-production starts with the pre-visualisation or Pre-Viz of the story. An integral part of every VFX shoot, this is the guide used during live shoots for frames and shots. Pre-Viz involves story-ideation, scriptwriting, storyboarding, animatics, initial concept art, character design, BG design and the colour key for look development.

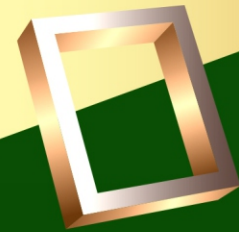

PRODUCTION

The production stage includes integrating Computer Generated (CG) characters, backgrounds and effects that blend with live action. CG production consists of 3D modelling, texturing, rigging, animation, lighting, rendering and FX. Production also involves shooting High-Dynamic Range Images (HDRI) to create image-based lighting for 'CG-Live Action' integration.

POST-PRODUCTION

The final stage begins with Rotoscopy, where an expert known as a Roto Artist, draws around the character in each frame. Going forward, with accurate camera tracking, the matching of the live action camera along with a CG camera is carried out. Artists then create the frames and backgrounds for the final output. Here, with matte painting, the artists replace the background and then blend it together through compositing – all the visuals from the live-action and CG come together to create a photorealistic output.

BPVFX+

BRILLIKO ADVANCE PROGRAM IN VISUAL EFFECTS - 30 MONTHS

Visual effects involve the integration of live-action footage and generated imagery to create environments which look realistic, but would be dangerous, costly, or simply impossible to capture on film. Visual effects using computer generated imagery has recently become accessible to the Independent filmmaker with the introduction of affordable animation and compositing software. Brilliko offers programs in Visual Effects to help build your career in the respective fields.

CAREER OPTIONS
